Summary

Frontend and mobile engineer with 4+ years building production apps in React, Next.js, TypeScript and React Native, across marketplaces, fintech/crypto and media. Currently the main frontend contributor on BikeFlip, a 5-language European used-bike marketplace, owning features end to end from Figma to Playwright tests. Strong focus on performance, payments, real-time features and production reliability.

Skills

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS, Python, SQL
- **Web:** React, Next.js (SSR/SSG, Pages Router), SWR, React Context, Zustand, Formik + Yup, next-intl (i18n)
- **Mobile:** React Native, light/dark theming, multilingual apps
- **UI:** SCSS Modules, Tailwind CSS, Ant Design, Bootstrap, responsive design, Figma handoff
- **Integrations:** Stripe, Pusher / Laravel Echo, Sumsb KYC, Amplitude, Sentry, Builder.io, Google Maps, AWS S3, Castle.io, Cloudflare Turnstile, NextAuth (OAuth)
- **Backend & APIs:** REST APIs, Axios, Django / Django REST, Strapi, MySQL
- **Testing & tooling:** Playwright (e2e), GitHub Actions CI, Git (GitHub, Bitbucket), Postman, Docker, Node.js
- **Practices:** performance optimisation, SEO (canonical/hreflang, sitemaps), web security (CSRF, XSS), Agile / Scrum

Experience

Software Frontend Developer — BikeFlip

Rovereto, Italy · 07/2025 – Present

Used-bike marketplace (bikes, components, clothing) serving 5 European locales. Stack: Next.js 16, React 19, TypeScript, SWR, Stripe, Pusher, Amplitude, Sentry, Playwright.

- Main frontend contributor on a production SSR marketplace in EN/DE/IT/ES/FR; ship features end to end across search, listings, checkout, payments and real-time chat.
- **Performance:** made Stripe.js, analytics and SEO data load only when needed, and limited each page to the translations it uses, shrinking initial JavaScript; added instant signed-in state on first paint.
- **Search & SEO:** rebuilt search on collection URLs for all three product types, with redirects, URL sync, canonical/hreflang tags, sitemap and breadcrumbs.
- **Checkout & payments:** worked on the Stripe checkout flow; fixed a race between order acceptance and payment capture, and silent failures when booking pickups.
- **Security:** built an email one-time-code login challenge triggered by Castle.io fraud detection.
- **Listing creation:** built direct-to-S3 image uploads, a live condition rating, AI-suggested specs and new pickers from Figma designs.
- **Reliability:** set up Sentry reporting and cut alert noise; found production error reporting was silent, and grouped network errors that were 92% crawler traffic.
- **Real-time chat:** built messaging features on Pusher / Laravel Echo: pending-action notifier, options menu with block/archive, shipping-label actions.
- **Quality & infra:** wrote Playwright e2e suites with mocked APIs, migrated the app to Node 24, maintained GitHub Actions CI.

Web & Mobile Developer — NIZA Global

Vilnius, Lithuania · 01/2024 – 10/2025

Fintech and crypto exchange; web and React Native apps.

- Built core mobile features in React Native: trading and exchange modules, launchpad and airdrop integrations.
- Built payment flows with Sumsb KYC verification for compliant, low-friction onboarding.
- Led a UI refactor to a consistent design system, with light/dark mode and multilingual (i18n) support across web and mobile.
- Improved app performance and applied cryptographic safeguards for data integrity and transaction security.

Software Developer — Confidential Client

New York, USA · 10/2023 – 07/2026 · Under NDA

Digital content platform; built the user app and admin dashboard from architecture to deployment.

- Built video streaming and purchase of digital content (videos, images), with an internal wallet for payments.
- Integrated an AI-powered chat to drive user engagement.
- Built profiles, content upload/editing and third-party sign-in.
- Built the admin panel for content, users, transactions and settings.

Web & Mobile Developer — Marine Data Cloud Ltd

London, UK · 07/2022 – 02/2024

Data-driven web and mobile products for the maritime industry.

- Built responsive web and mobile interfaces in React, Next.js and React Native.
- Built REST APIs and data models in Strapi to support complex workflows.
- Improved page speed and SEO, and applied secure coding practices against XSS and SQL injection.
- Managed deployments and hosting, and worked directly with clients on requirements and delivery.

Education

- **Master in Criminal Law** — University of Tirana, Faculty of Law · 09/2019 – [end date]
- **Bachelor of Law** — University of Tirana, Faculty of Law · 09/2016 – 09/2019

Languages

- **Albanian:** native
- **English:** C1 (professional working proficiency)
